IFRA Category(ies) [see Table 12 in Guidance for the use of IFRA Standards for details]	Level of use (%) *
Category 10.B	100.00%
Category 11.A	2.93%
Category 11.B	2.93%
Category 12	Not limited

* Actual use level or maximum use level

How to read these figures

The percentages above are the maximum concentration of this fragrance mixture in the FINISHED CONSUMER PRODUCT — not in an intermediate base or concentrate. Where the mixture is diluted into a base before use, carry the arithmetic through both steps.

“Not limited” means no IFRA Standard restricts the mixture in that category, though other regulation may apply. “0.00%” means the mixture must not be used in that category at any level. “Not approved” means the mixture is not certified for that category.

For other kinds of application or use at higher concentration levels, a new evaluation may be needed; please contact Veriscents.
