

IFRA CONFORMITY STATEMENT

Eugenol | CAS 97-53-0 | Source certificate: 26 August 2026 (version 3)

This statement reproduces the use-level assessment supplied for Eugenol under the IFRA 51st Amendment (published June 2023). The percentages below represent maximum concentrations of this material in the finished product for the corresponding IFRA category.

MAXIMUM USE LEVELS

IFRA Category	Maximum concentration in finished product
1	0.45%
2	0.14%
3	1.00%
4	2.50%
5A	0.64%
5B	0.64%
5C	0.64%
5D	0.21%
6	1.50%
7A	2.00%
7B	2.00%
8	0.21%
9	4.91%
10A	4.01%
10B	18.04%
11A	0.21%
11B	0.21%
12	Not limited

IFRA-LIMITED CONSTITUENTS

Constituent	CAS	Reported concentration
Eugenol	97-53-0	99.7390%
Methyl eugenol	93-15-2	0.0080%

APPLICATION NOTES

Category 4 includes fine fragrances such as eau de toilette, parfum and cologne. Category 12 includes products with no direct skin contact such as candles and many ambient fragrance systems.

The underlying IFRA conformity assessment does not replace a comprehensive safety assessment of the finished product. Other applications or higher concentrations require further evaluation.

Veriscents document revision: 17 October 2026. Technical limits transcribed from the supplied IFRA certificate; no new independent IFRA assessment is claimed.
