Category 12	Not limited

Restricted substances

The supplied certificate states that no substances restricted by the referenced IFRA Standards are present. The category limits below are reproduced from the supplied certificate and must not be interpreted as an independent new assessment.

Important limitation

These concentrations are maximum levels for the material in the finished consumer product under the cited assessment, not recommended fragrance dosage. The certificate does not replace a full safety assessment. Confirm that the supplied source material corresponds to the Veriscents inventory before issuance.
