Materials for Modern Perfumery

SAFETY DATA SHEET — 16 Sections

CEDRAMBER | Cedryl Methyl Ether | CAS 67874-81-1

1. Identification

Product: Cedramber (Cedryl Methyl Ether). **CAS:** 67874-81-1.

Identified use: Fragrance ingredient.

Supplier: Veriscents, 30 N Gould Street, Sheridan, WY 82801, USA. Telephone: 877.863.7700. Regulatory Contact.

Medical exposure (24 hours, USA): Poison Help 800-222-1222. **Hazardous materials incident contact:** HazmatLine +1 (813) 742-5152; support@hazmatline.com. Transport emergency coverage must be confirmed for each regulated shipment.

2. Hazard identification

OSHA HazCom classification: Skin sensitization, Category 1B.

Signal word: Warning. **Hazard statement:** H317 — May cause an allergic skin reaction. **Pictogram:** GHS07 (exclamation mark).

Precautions: Avoid breathing vapors or dust; wear protective gloves and eye/face protection. Contaminated work clothing should not leave the workplace. If on skin, wash with plenty of soap and water. If irritation or rash occurs, get medical attention. Wash contaminated clothing before reuse. Dispose of contents/container in accordance with applicable regulations.

Other hazards: None reported as hazards not otherwise classified in source SDS.

3. Composition/information on ingredients

Product identifier: Cedryl Methyl Ether; CAS 67874-81-1.

The supplied SDS withholds specific ingredient identities as trade secrets under 29 CFR 1910.1200. It does not provide a quantified composition; no purity percentage is asserted here.

4. First-aid measures

Inhalation: Move to fresh air, keep at rest, and seek medical attention.

Eyes: Flush with water for at least 15 minutes. Seek medical advice if symptoms persist.

Skin: Wash thoroughly with soap and water. Seek medical attention for rash or irritation.

Ingestion: Rinse mouth with water and obtain medical attention.

Symptoms: Allergic skin reaction. Treat symptomatically.

5. Fire-fighting measures

Suitable extinguishing media: Carbon dioxide, dry chemical, foam.

Combustion hazards: Carbon monoxide and unidentified organic compounds may be produced.

Protection: Firefighters should use suitable respiratory protection where ventilation is insufficient.

6. Accidental release measures

Avoid inhalation and contact with eyes and skin. Remove ignition sources, provide ventilation, and contain spills using sand or inert absorbent. Dispose of collected material under applicable regulations.

7. Handling and storage

Use with adequate ventilation and appropriate PPE. Keep away from heat, sparks, open flames and hot surfaces; no smoking. Do not eat, drink or smoke while handling.

Keep tightly closed in a cool, well-ventilated location. Take precautions against static discharge; use suitable grounded equipment and non-sparking tools where warranted.

8. Exposure controls/personal protection

Exposure limits: No occupational exposure limits reported in the supplied SDS.

Engineering controls: Adequate ventilation, eyewash and emergency shower facilities.

PPE: Chemical-resistant gloves, eye/face protection, and suitable clothing. Use appropriately selected NIOSH-approved respiratory protection where engineering controls are insufficient or exposure is uncertain.

9. Physical and chemical properties

Flash point: >94°C (>201°F). **Explosion hazard:** Product does not present an explosion hazard, per source SDS.

Appearance, odor, pH, melting/freezing point, boiling range, vapor pressure, density, solubility, partition coefficient, autoignition temperature, decomposition temperature and viscosity: Not determined in the supplied SDS.

10. Stability and reactivity

Stable under normal storage conditions; no significant reactivity expected with water. Avoid extreme heat and contact with strong acids, alkalis, or oxidizing agents. Hazardous reactions not expected under normal use.

11. Toxicological information

Skin sensitization: Category 1B; may cause an allergic skin reaction.

Available data do not meet classification criteria for acute toxicity, skin irritation, eye damage/irritation, mutagenicity, carcinogenicity, reproductive toxicity, STOT or aspiration hazard, according to the source SDS. Acute inhalation data not available.

12. Ecological information

Ecotoxicity, persistence/degradability, bioaccumulation, mobility in soil and other adverse effects: Not available in the supplied SDS.

13. Disposal considerations

Dispose of material and packaging in accordance with applicable local, state and federal requirements. Do not release to drains or the environment.

14. Transport information

US DOT (including bulk): Not classified in the supplied SDS.

IMDG, ICAO TI, ADR/RID/ADN and UN Model Regulations: UN 3082, ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (Cedryl methyl ether), Class 9. The supplied SDS does not specify a packing group.

Environmental hazards: Source SDS separately states “Not environmentally hazardous for transport,” which is inconsistent with its UN 3082 entries. Verify classification, packing group, marine-pollutant status and any applicable exceptions before

international shipment.

15. Regulatory information

Prepared using the supplied OSHA HazCom SDS (29 CFR 1910.1200). No additional substance-specific regulations were listed in the source.

16. Other information

Veriscents document date: November 5, 2026. **Technical source SDS:** Version 2, issued August 26, 2025.

This sheet summarizes available product safety information for workplace hazard communication. It does not replace assessment of actual product composition, conditions of use, or applicable transportation requirements.
